

*a town for a lifetime*  
**IRONDEQUOIT** *New York*

December 3, 2020

Dear Resident,

As a community, we are proud to be taking steps to achieve local environmental goals. The Town of Irondequoit is happy to be partnering with the Town and Village of Pittsford, the Town of Brighton, Joule Community Power, and our local partner Roctricity, to form Monroe Community Power.

**Through Monroe Community Power, the Town of Irondequoit is now offering our residents and small businesses a fully vetted community solar program.** If you choose to participate in this program, you will be able to subscribe to a local community solar project and support the generation of renewable energy.

**As a resident (homeowner and renter) or small business who enrolls in community solar you can:**

- Access the benefits of solar without needing to install panels on your rooftop or property\*
- Save up to 10% annually on your electricity costs
- Support the development of clean, renewable electricity in NY State
- Participate without risk because you may cancel without penalty at any time

*\*If you have your own solar panels or participate in another solar program, you already receive solar credits and are thereby ineligible to enroll in a community solar program.*

Each enrollment in this community solar program, in addition to saving you money and supporting local renewable energy, will generate \$50 for an Irondequoit Sustainability Fund, which will be used for a future project to benefit the community.

Because there is only so much power a solar farm can generate, these community solar farms will be closed to new enrollment when they become fully subscribed—**just one more reason to enroll today!**

**Enroll and learn more at [www.monroecommunitypower.com/enroll](http://www.monroecommunitypower.com/enroll)**

**Ask questions** or get help with enrollment by calling Roctricity at **(585) 244-0244**.

You are invited to join me and the Monroe Community Power team remotely on **Wednesday, December 9, 2020 at 6:30 PM** at a Public Info Session where we will discuss the program and answer your questions.

**RSVP** and get the virtual meeting details at **[www.bit.ly/irondequoit-solar](http://www.bit.ly/irondequoit-solar)**

As someone who has participated in a community solar program for the past two years, I hope you consider taking advantage of this opportunity.

Sincerely,

A handwritten signature in blue ink that reads "Dave Seeley".

Dave Seeley, Supervisor
